Developers Conference at Michigan Technological University Presentation Guidelines

We are looking for **enthusiastic**, **knowledgeable**, **passionate** people to give presentations about **relevant** technologies.

- Target audience is anywhere from a blank slate to a beginner.
- We want step-by-step tutorial style presentation.
- Lectures should be **fun**, **engaging**, and **easy to follow**, yet **full of content**.
- We want attendees to walk away with something complete that **they can show off to their friends/family.**
- Speakers must be **passionate** about the subject.
- This is **not** a lecture!
- Ideal presentations should be between 30 minutes - 2 hours in length.
- Going over the allotted presentation time by a few minutes will be okay, but we will be on a pretty strict schedule.
